

Delta G Ventures Expands Experienced Team

Palm Beach County, FL – (December 28, 2023) – Delta G Ventures, founded in 2015 as a strategic advisory firm in the life sciences industry, announced today that it has greatly expanded its advisory services team. Joining managing partner, Lars Janson are two additional managing partners, Bart Doedens and Russ Bonafede.

Messrs. Doedens and Bonafede have served as CEOs for several healthcare companies leading them while introducing innovative technologies to the global market. This new managing partner team represents 30 years of comprehensive experience, knowledge, and leadership in developing and commercializing life science technologies and will allow DGV to service a greater number of clients seeking executive guidance.

In addition to the strengthened leadership team, more than 10 associates have joined the team representing subject matter expertise in multiple areas. Please refer to <https://deltaventures.com/member-type/our-team/> for a listing and profiles of this impressive group of advisors.

Lars Janson, Managing Partner said: "The addition of Bart and Russ as managing partners, as well as the wide range of capabilities new associates bring, provides a unique blend of expertise and longevity not found with other firms focused on the life science sector. I am humbled to be surrounded by this top-notch talent and excited to help our clients succeed in their endeavors".

As we move into 2024, DGV will rapidly grow its already robust client list and offer a broader range of services. A list of services DGV offers can be found at the following link <https://deltaventures.com/services/>. Interested parties are encouraged to contact DGV at <https://deltaventures.com/contact-us/> or contact Managing Partner, Lars Janson, at lars.janson@deltaventures.com.

About Delta G Ventures

DGV was established in 2015 as a boutique consulting services firm focused on the life science industry. The company, consisting of three managing partners with more than 30 years of experience and expert associates worldwide offers comprehensive experience, knowledge, and leadership in the development and commercialization of life science technologies globally. Throughout its nearly decade-long history, DGV has assisted with the introduction of multiple landmark technologies in the dental, cardiovascular, neurovascular, endovascular, orthopedic, ophthalmology, transport chairs, and wound management sectors. The company focuses on being an extension of its customer's business with a "their success is our success" mentality that drives its day-to-day operations. DGV is located in Palm Beach County, Florida, and services national and multinational customers.
